

KELLER AG is an internationally leading system manufacturer for frameless sliding windows. The modular premium concept minimal windows® captivates through its slender profile geometry and allows an unusual architectural design for an open building style with maximum incidence of light and no thresholds.

The company has gained international fame through the development, manufacture and sales of individually designed, exclusive conservatories.

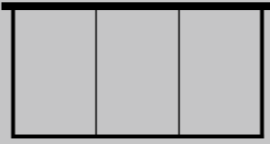

The large minimal windows® fixed and sliding windows impress with a variety of designs with single, double or triple glazing. The appealing, minimalist design for open room concepts is individually combinable, depending on the architectural requirements.

minimal windows®

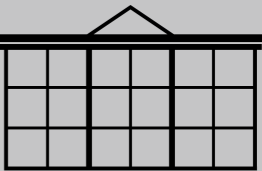

High-quality windows and doors made of aluminium and wood-aluminium – manufactured in proven quality in accordance with the customer's requirements. Clear style and reduced design are the outstanding characteristics of the KELLER architectural style.

DOORS & WINDOWS

The KELLER GLASSHOUSE® represents the symbiosis between the slender minimal windows® fixed and sliding windows and the special flat-roof conservatory designs developed by KELLER. The construction meets the high quality requirements of the passive house standard.

GLASSHOUSE®

The KELLER ORANGERIE Elegance® and the TOSCANA and IMPERIAL series offer a wide range of options for individual living in absolute top quality. KELLER skilfully combines architectural design advantages with functionality.

ORANGERIE®
